TUTELAGE

The work of faculty members is multi-faceted: they need to balance research, teaching and service — Aristotle

Flipped and Blended Learning are the pedagogical methods which help the Pupil Teachers learn new skills, engaging students with an active learning strategy.

Online Internships have been organized for the first time in history due to the pandemic and it marks the success of our Education School.

Soft Skills training is provided to students in order to develop strong leadership, delegation, teamwork and communication abilities which will help them in their overall personality development.

Why is Teaching Internship Unique at IEdS?

The ICFAI Education School prepares the pupil teachers by a specially designed training programme that facilitates development of necessary abilities and skills in each teacher trainee so that they are able to meet the challenges of the competitive era ahead to the best of their abilities.

Before taking them to the rigorous internship programme in the 3rd Semester the pupil teachers are given an exposure to the real life situation in schools. Hence in the first semester the pupil teachers are engaged for 15 days in schools known as Preliminary School Engagement (1). The objective of this engagement is that the pupil teachers get an opportunity to observe regular class room teaching with respect to pedagogical practices and class room management techniques used by the teachers of the schools. It also gives them an insight and reflection on roles and responsibilities of different school staff and to also to critically study the infrastructural facilities, viz. Library , Laboratories, Playground, etc of the school.

Why is Teaching Internship Unique at IEdS?

In the second semester, again there is an engagement of 15 days in the school of the pupil teachers. This is known as the Preliminary School Engagement (2) which provides the students opportunities to Organize Co-curricular and co-scholastic activities in collaboration with the school teachers .

The third Semester has a rigorous internship programme of three months.

The initial first month is devoted to training the pupil teachers in the campus, in the nuances of teaching skills by Micro Teaching. As the name suggests it breaks the teaching skills and components in micro and separate units which focuses on understanding behaviors important in classroom teaching. It increases the confidence of the pupil teacher because the training is so designed as to enable the student-teachers to connect theory to practice in order to undergo a meaningful experience.

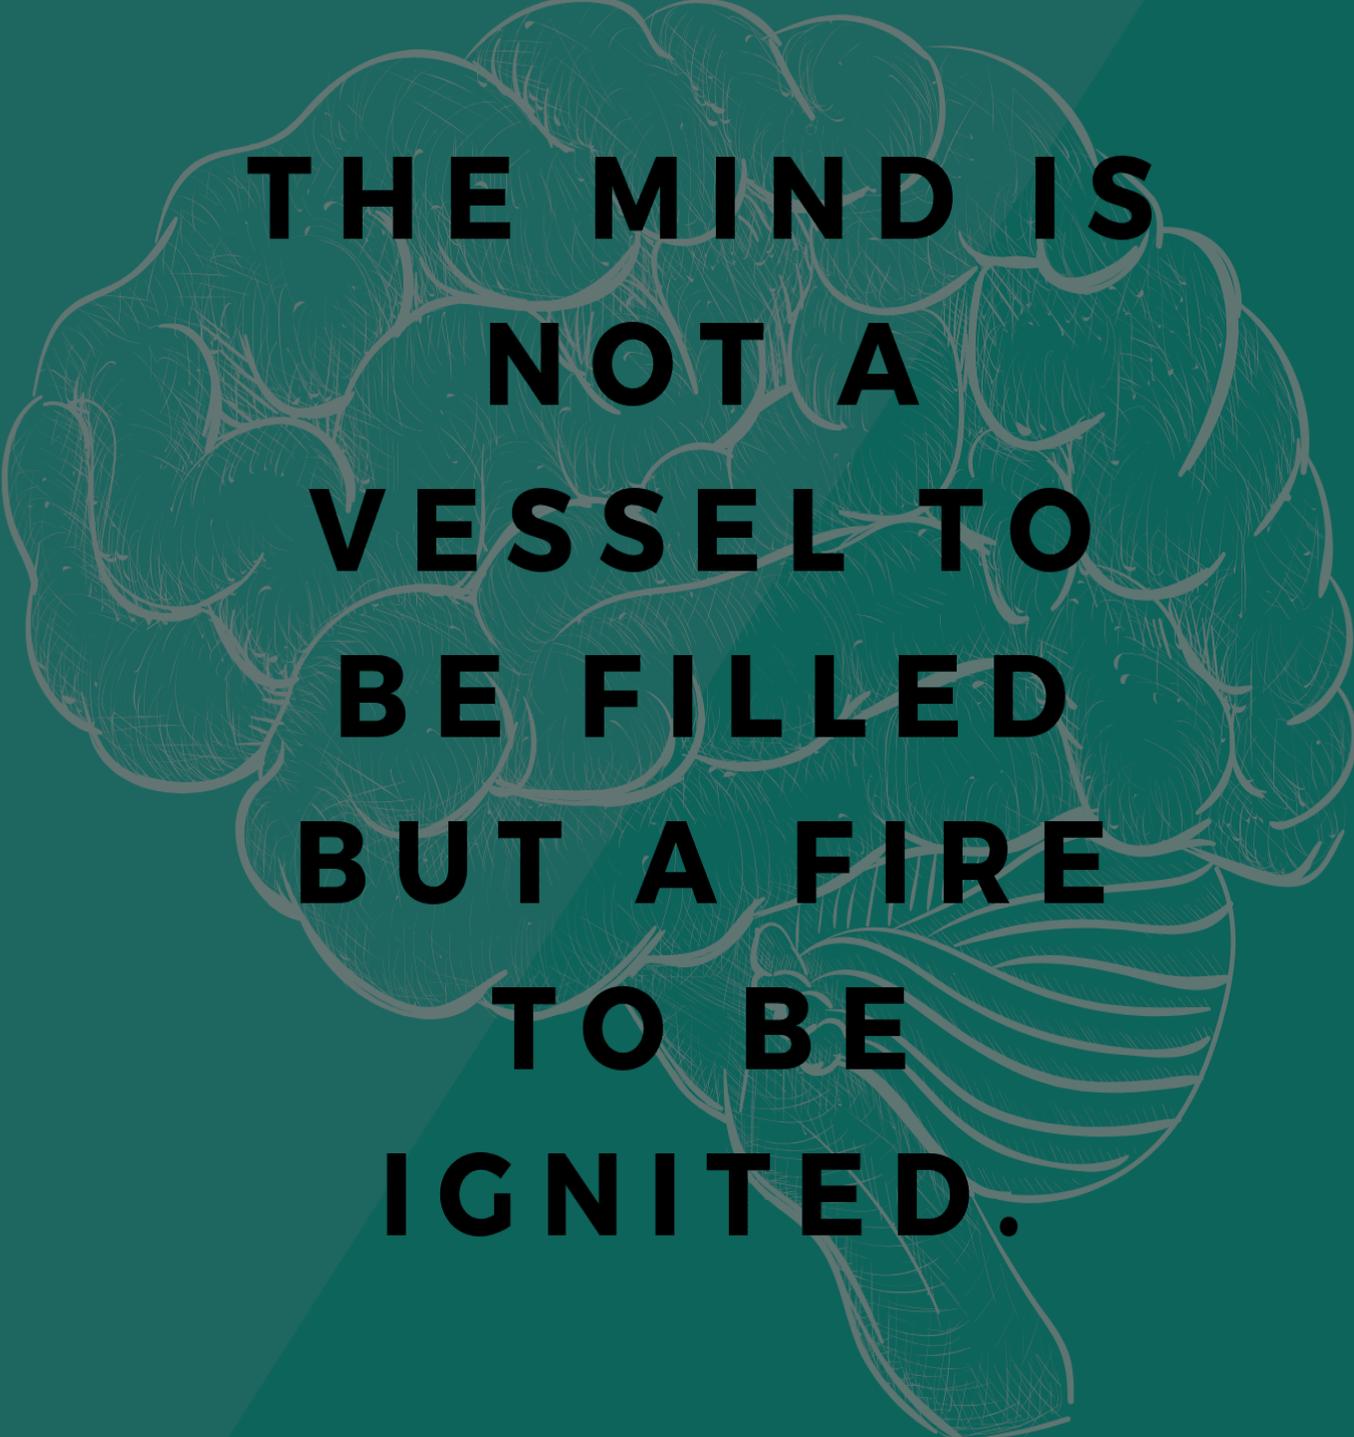

Why is Teaching Internship Unique at IEdS?

Gradually they are moved over in a smooth manner to Macro Teaching Training which amalgamates the components and skills of teaching into a single unit.

The students are then trained for simulated teaching. Simulated teaching is an artificially arranged teachers training technique which helps the pupil teachers to learn the art and techniques through role playing.

Simulated teaching helps them to come to terms with demands of a complex skill learning without the stress of the real situation. At the same time it is to be preferred to merely training the pupil teachers how to teach when he finds himself actually in the school.

ENVIRONMENT DURING LOCKDOWN

Environment has always been supreme but we somehow started harassing it with our daily activities and actions. While we all are locked-up as we are going through a pandemic situation the environment has began to heal from the exploitation that we have done to our mother earth in the past years. This lockdown possie has made us realize how important and useful it is for us to understand what we have done to this beautiful planet where we live. Thought it is a lot for some of us to handle and we are going through lots of changes which are exciting for some of us whereas, unbearable for others.

In the past, we became so busy in our routine life that neither of us noticed how mesmerizing our surrounding had been. The noise and honking of vehicles had engulf the delightful chirping of the birds which now we can listen while seating at our window. Those heavenly empty roads which are now overlie with fallen leaves as if no one has travelled on them for years while, seeing them it felt like as if you contemplate "heaven on earth" and there is no turning back to your routine life and the time should pause here itself. These enthralling sight make you feel special everyday during this affair.

The pandemic stich might have made us suffer a lot but it also taught us how we can keep our environment safe and how we can work towards getting a change and protecting it for many more years as there is nothing in this world as graceful as the ambience of our planet earth. This isolation circumstance made us close and warm-hearted to our mother earth and we should not forget what it had been through because of we humans. We should put efforts to maintain the real essence of this artistic planet. We won't be getting such opportunities anymore.

On this environment day, I pledge to protect our environment from all the chemicals and plastics.
