

## Celebration of Himalayan Day

Himalayan Day is celebrated every year on 9<sup>th</sup> September to value the importance of Himalayas in our life and the whole nature cycle. This day was chosen by activists to bring awareness to save the Himalayas which are under ecological threat due to increased human interference. Conserving the Himalayas should be the prime duty of every citizen of the country. Making a contribution to this, students of B.Ed prepared Models, charts and had a discussion in order to improve the degenerating condition of Himalayas.
